SKILLS

- Proficient in programming languages : Java | C++ | C | Python | Assembly
- Experienced in : OOP | SQL | Algorithms | Data structures | System Programming | Machine laerning | Cyber security

LANGUAGES

- English (Fluent)
- Hebrew (Native)

PROFILE

Motivated and detail-oriented Computer Science student at the Hebrew University of Jerusalem, passionate about software development and algorithmic problem-solving. Skilled in multiple programming languages and experienced in building efficient, modular systems. Currently seeking a software development position where I can apply my technical and analytical skills in a practical environment.

MILITARY SERVICE

Commander - Nativ Program, Israel Defense Forces Led and mentored groups of soldiers in a preparatory education framework. Responsible for instruction, coordination, and personal development of participants, emphasizing leadership and teamwork.

EDUCATION

Hebrew University Of Jerusalem Computer Science Coursework: Data Structures, Algorithms, Object-Oriented Programming, Operating Systems, Databases, Machine Learning, Cyber Security

PROJECTS

DNS Security & Cache Poisoning Simulator (C)

- Executed a Kaminsky-style attack against a BIND9 resolver within an isolated Docker environment.
- Created a distributed C architecture using raw sockets to win TXID races via a TCP control channel.
- [View on GitHub]

Modular 2D Arcade Engine (Java)

- Built a Breakout game applying Strategy/Factory patterns to dynamically decouple structural brick behaviors.
- Engineered a reactive lives HUD and event-driven game flow utilizing advanced OOP principles.
- [View on GitHub]

Generic Markov Chain Text Engine (C)

- Developed a generic C library with strict dynamic memory management and automated frequency transitions.
- Built a stochastic tweet generator and board game simulator to demonstrate modular component reusability.
- [View on GitHub]
